Lots 1 and 2, Concession 2, City of London, formerly Township

ever obtained from the owners of the land concerning the said  
Expropriation;

That the said Approach Lighting System has been  
decommissioned, removed and replaced by a Centre Line System.  
In negotiating for the Department's new Approach Lighting  
System, Mr. Brian R.B. Magee, the successor-in-title to the  
said property, has requested that the said Expropriation filed  
on August 20, 1946 be cancelled;

will be taken out of production for the most part for as long  
as we use the easement; and

of the Privy Council, approved by His Excellency the Governor  
General on the

26th May, 1966

The Committee of the Privy Council, on the recommendation of the Right Honourable Lester Bowles Pearson the Prime Minister, advise that Clarence Lyle Barber of the City of Winnipeg, Province of Manitoba, be appointed a Commissioner under Part I of the Inquiries Act to inquire into the costs of farm machinery and repair parts and, in particular, without limiting the generality of the foregoing, to consider and report upon

- (1) the factors affecting the price to the user of agricultural machinery and equipment and parts in Canada including full reference to the impact of financing, distribution and servicing costs on the total price of the user;
- (2) the costs to the user of agricultural machinery in Canada as compared with the costs of similar equipment to users in other countries, both in absolute terms and in relation to total costs;
- (3) the present and prospective competitive position of the Canadian agricultural machinery industry in Canadian and in export markets as compared with agricultural machinery industries in other countries, including an examination of research and development activity and its relationship to the establishment of new facilities in Canada;
- (4) the historical and present relationship between the price and the productivity of agricultural machinery; and
- (5) measures that would contribute to the expansion of efficient production of agricultural machinery, the attainment of technological advances, the improvement of distribution, financing and servicing facilities

and the enhancement of the industry's competitive position so that Canadian farmers would be ensured most favourable prices for, and availability of, machinery and parts.

The Committee further advise

- (a) that the Commissioner be authorized to exercise all the powers set out in section 11 of the Inquiries Act;
- (b) that the Commissioner be authorized to engage the services of counsel, technical advisers, experts and staff as may be required, at rates of remuneration, including transportation and living expenses as may be approved by the Treasury Board;
- (c) that the Commissioner adopt such procedure and methods as he may from time to time deem expedient for the proper conduct of the inquiry and sit at such times and at such places in Canada as he may decide from time to time;
- (d) that the Commissioner be assisted to the fullest extent by government departments and agencies; and
- (e) that the Commissioner report to the Governor in Council and file with the Dominion Archivist the papers and records of the inquiry as soon as reasonably may be after conclusion of the inquiry.

The Committee of the Privy Council have had before them a report dated 1st June, 1966, from the Minister of Transport representing:

That the Management of Canadian National Railways advise that under authority of Order in Council P.C. 1965-2245 of 15th December, 1965, approval was granted for construction, operation and maintenance by the Canadian National Railway Company of an industrial railway spur track, approximately two miles in length, to provide access to the new pulp mill of Consolidated Pontiac Incorporated near Portage du Fort, Quebec, and coming off Mileage 59.32 Beachburg Subdivision, at an estimated cost of \$300,000;

That during construction, it was found necessary to revise the alignment for a distance of 2,092 feet to avoid a swamp area which proved to be unsuitable for construction. This departure from the approved line is shown coloured red on Railway Drawing BEA-8X-8A revised February 23, 1966, on record in the Department of Transport, and the plan, profile and book of reference have been revised to show the details of the diversion;

That, it will be noted from the said Drawing that the proposed diversion will shorten the spur by some 150 feet as indicated in the chainage equation  $20 + 32 = 21 + 82$  and that the Canadian National's portion of the construction will end at chainage 101+00 instead of chainage 104+00, previously approved, or some 300 feet less; and

That the Minister of Transport has sanctioned the location of the revised alignment, aforesaid, as shown coloured red on Railway Drawing BEA-8X-8A revised February 23, 1966, on record in the Department of Transport.

Certified to be a true copy of a Minute of a Meeting of the Committee  
of the Privy Council, approved by His Excellency the Governor  
General on the 28th June, 1966

The Committee of the Privy Council have had  
before them a report dated 21st June, 1966, from the  
Minister of Transport representing:

That the International Telecommunication  
Convention (Montreux) was signed by Canada (and 117 other  
countries) on November 12, 1965 at a Plenipotentiary  
Conference of the International Telecommunication Union  
(I.T.U.) held in Montreux, Switzerland;

That Order in Council P.C. 1965-1840 of 18th  
October, 1965 authorized Canada to sign the Convention  
which will enter into force on January 1, 1967 and will  
replace the previous Convention of Geneva, 1959;

That Article 16 of the Montreux Convention  
provides that the expenses of the I.T.U. shall be met  
from the contributions of the Members and Associate  
Members by annual payments paid in advance, each Member  
and Associate Member paying a sum proportional to the  
number of units in the class of contribution it has  
chosen to defray;

That during the period 1961-1966 Canada's  
contributions to the International Telecommunication  
Union has been in the 18 unit class, or approximately  
3.28 percent of the I.T.U. total expenditure;

That Additional Protocol II to the International  
Telecommunication Convention (Montreux, 1965) requires that

- "1. Every Member and Associate Member shall  
inform the Secretary-General before  
1 July, 1966 of the class of contribution  
it has chosen from the table of classes

- 2 -

of contributions shown in 212 of the International Telecommunication Convention (Montreux, 1965).

2. Members and Associate Members who have failed to make known their decision before 1 July, 1966 in accordance with the requirements of paragraph 1 above, will be required to contribute the same number of units as they contributed under the Geneva Convention."

That it is desirable to maintain Canada's contribution at the 18 unit level for the calendar years 1967 - 1971 inclusive and in accordance with the limits of expenditure provided in Additional Protocol I of the International Telecommunication Convention (Montreux, 1965) it is estimated that Canada's share of I.T.U. expenditures during the calendar years 1967 - 1971 will not exceed one million one hundred thousand dollars.

The Committee, therefore, on the recommendation of the Minister of Transport, advise that Your Excellency may be pleased to approve the contribution by Canada of 18 units towards the expenses of the International Telecommunication Union effective January 1, 1967 for the calendar years 1967 - 1971 inclusive.

That the Fur Conservation Agreement with the Province of Manitoba, authorized by Order in Council P.C. 680 on 18th October, 1949, became effective on August 21st, 1949, and is not due to terminate until March 31st, 1953;

That re-organization of the Manitoba Department of Mines and Natural Resources has resulted in administrative changes which have made it difficult to determine the sharing of costs under the present formula;

That the Joint Fur Advisory Committee recommended that the Agreement dated August 21st, 1949, be terminated and that a revised Agreement be executed providing for a new cost sharing formula, bringing other portions of the Agreement up-to-date, and providing for a Federal share of actual expenditures of 50% with the maximum annual Federal contribution to remain at \$60,000; and

That the Province of Manitoba has agreed to the terms of the attached Fur Conservation Agreement.

The Committee, therefore, on the recommendation of the Minister of Northern Affairs and National Resources, advise that Your Excellency may be pleased to authorize the Minister of Northern Affairs and National Resources to execute the said Fur Conservation Agreement with the Province of Manitoba, in the form attached hereto, on behalf of Her Majesty in right of Canada.

The Committee of the Privy Council have had before them a report dated 21st June, 1966, from the Minister of Northern Affairs and National Resources representing:

That Order in Council P.O. 4066 of 7th October, 1947, authorized the Minister of Mines and Technical Surveys to execute on behalf of Her Majesty an agreement with Yukon Coal Company Limited, Carmacks, Yukon Territory, Connect Explorations Company Limited, Spenceville, Ontario, and with Reno Mining Company Limited, Mayo, Yukon Territory, respecting the development of certain coal lands in the Yukon Territory;

That the agreement, dated as of July 10, 1947, provided, among other things, for a loan by Her Majesty to Yukon Coal Company Limited of monies not exceeding a total of \$300,000 repayable with interest at 5% per annum by payment of a minimum of \$2 for each short ton of coal produced from the coal lands described in the agreement;

That on March 8, 1948, Her Majesty issued to Yukon Coal Company Limited a coal mining lease, numbered 2541, of lands adjacent to the coal lands mentioned in the said agreement;

That owing to a boundary error, the said Yukon Coal Company Limited in mining pursuant to the said agreement, mined some of its coal from the leased lands and paid the said amount of \$2 for each short ton on all the coal including the coal from the said leased lands, on the belief that the coal had been mined from the said coal lands;

That an accounting difficulty was created by such mixing of the coal;

That to adjust the matter, it is proposed to amend, as set out in the Schedule hereto, the said agreement to include as part of the coal lands mentioned therein the lands leased by the said lease numbered 2541;
